About C Future City West Tower

Located within an emerging technology district of Shenzhen, C Future City West Tower is part of a pair of gateway twin towers and first phase

of the larger C Future City complex combining office, residential, retail and entertainment facilities. The complex's multiple uses are stitched together with four levels of podium structure clad with a glass curtain wall embedded with a color changing mesh of LED illumination.

Taking advantage of the transit oriented location, C Future City is positioned between the Xiasha and Shangsha metro stations which brings travelers to the nearby Futian Station hub, where the Guangzhou-Shenzhen-Hong Kong Express Rail Link connects to Hong Kong's harbourfront in 14 minutes.
